

I am a subscriber to WM Radio because it provides a service that is reliable, no fading in and out signal and searching for local station that provide their version of information when they can work it in between commercials. The traffic and weather provides me with advance information the I can not get from "local Stations" on a frequency that allows me to make alternate plans and to take alternate routes. The local stations often do not inform me of situations until I am in to the condition that I can do nothing about thus sitting in traffic jams waste my production time and the extremely valuable fuel. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I, respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
